OB Documentation & Legal Issues In OB Care

OB & Birth Optimizing Outcomes

### Key Course Objectives

**By the end of this 1-1/2 day seminar you should be able to:**

1. Identify 2 characteristics of adequate labor.
2. Differentiate adequate contractions from inadequate labor.
3. Differentiate the potential causes of dystocia.
4. Differentiate 2 actions to decrease uterine activity.
5. Explain the physiology of early decelerations.
6. Differentiate mechanical dystocia from functional dystocia.
7. Define cephalopelvic disproportion.
8. Discuss the dangers of cephalopelvic disproportion treated as functional dystocia.
10. Identify 2 methods to estimate fetal weight.
11. Describe the potential for Leopold maneuvers.
12. Plot 3 labor curves.
13. Identify labor abnormalities (descent and dilatation) based on 3 plotted labor curves.
14. Identify 3 categories recommended by the NICHD workshop.
15. Identify 5 critical attributes of fetal monitoring concepts.
16. Distinguish between uterine overstimulation and understimulation.
17. Identify the NICHD workshop recommendations for uterine activity noncertainty.

Charlie Daniels RNC, BA brings 25 years of expertise in labor and delivery. She currently works in the birthing center at a Level II Chicago suburban hospital. Charlie has been responsible for various aspects of maternal and newborn care, including: antepartum, labor, vaginal and cesarean delivery, operating room, postpartum/newborn care and fetal monitoring education.

In addition to her clinical work, Charlie has provided legal nurse consultant services for both the plaintiff and defense over the past 12 years. She has been involved in cases across the United States and has reviewed hundreds of obstetric-related cases. Charlie is able to provide real-life helpful hints as a result of her experiences with depositions and testifying at trial as an expert witness.

Charlie's commitment to her practice specialty is demonstrated through her active memberships with the Association of Women's Health, Obstetric & Neonatal Nurses and Sigma eta Tau and AWHONN.
